

Another printer specific solution from Bordeaux

PLASMA LED MK170™

UV LED ink for Mimaki® printers

Bordeaux's Plasma LED MK170 a Printer specific™ solution for Mimaki UCJV150, UCJV300, UJV100 printers models that are fully Mix & Match with Mimaki LUS-170 ink. The simple plug and print solution does not require technician assistance and zero downtime conversion. No need for re-profiling or flushing with excellent print quality of reliable vivid colors. Broad compatibility for a wider range of substrates.

Main advantages

Plasma LED MK170 is a UV-LED curable ink, Which delivers high performance for R2R applications. It is Ideal for printing on flexible sheet materials and rolled materials like vinyl, PET, paper, Point-Of-Purchase Displays, Polyester and banners. It is highly suited for applications where the graphics or signage needs to be folded and handled without scratching or chipping.

- Extended outdoor durability
- Inks match all attributes of Mimaki LUS-170 ink for optimal performance.
- Rigorous testing and stringent quality assurance guarantees precise color reproduction and high printing performance making the inks suitable for every rigid and flexible media.
- Incorporates Bordeaux Mix & Match™ and Printer specific™ technologies making the conversion simple, one color at a time, for maximum cost saving.
