

FOR BETTER PRINTING

For better compliance

The abundance of printer technologies of different manufacturers triggered Bordeaux's development of inks which are suitable for specific printers to enhance printing output performance while maximizing the printer's capabilities. The inks have been formulated for full compatibility with each printer and preceded by rigorous testing on all of them. The inks can be installed on the printers without modifications for uninterrupted printing experience and better results. All printer specific inks are packaged in OEM equivalent packaging for clean and easy installation and includes a printer-compatible chip

For better conversion

Bordeaux's proprietary Mix & Match™* concept enables on-the-fly conversion of the original ink to Bordeaux without the need to flush, replace parts and perform new color profiles in most configurations. Up to 40% of ink costs can be saved in comparison to original inks.
